RG termination kits are for making power, splice or tee connections inside a NEMA 4X enclosure through water tight CGB fittings primarily for roof and gutter applications.

The SCK-2 power termination kit is for terminating self-regulating or constant wattage heater cables into a NEMA 4X enclosure (customer supplied) through a CGB fitting. The kit comes with heat shrink tubing to isolate each conductor including the ground braid. The SCK-2 is ideal for use in roof and gutter applications and comes with wire nuts for connecting to service leads.
